PROJECT DETAILS

Criminal Investigation Tracker With Suspect Prediction:

This system propose a criminal investigation tracker system that tracks the investigation status of the criminal cases with logs and also predicts primary suspects. The system is proposed to help agencies like CBI, CID and other such bureaus to speed up investigation process and track status of multiple cases at a time. The system keeps logs of a case includes case summary, people involved disputes , past criminal history of those involved, items recovered on the scene and other details. The system realizes type of case, allows admin to update the status of investigation. The system also consists of a suspect prediction algorithm based on type of case, property, motive, land, modus operandi and other entities involve. The system studies past cases, past criminal records of involved and based on the data it provides suggestions of suspected persons in a logical order. The system is designed to aid the investigation teams to work collectively on cases, coordinates and also speed up the process by suggesting logical suspects based on data provided.
